1	Historical background & Laws of thermodynamics 1. Historical background:	12
	1.1.A brief historical background of thermodynamics and statistical Physics in the context of India and Indian culture, Contribution of S. N. Bose in statistical Physics.	
	 Laws of thermodynamics: Thermodynamical system and thermodynamical coordinates, Thermal equilibrium, Zeroth law of thermodynamics, The concept of path function and point function, Work done by and on the system. First law of thermodynamics, Internal energy as a state function, Reversible and irreversible change, Heat engine and its efficiency, Carnot's cycle, Carnot's engine and its efficiency, Carnot's theorem, Otto engine, Otto cycle, diesel engine. Second law of thermodynamics, Statement of Kelvin-Plank and Clapeyron, Absolute scale of temperature: Zero of absolute scale, Size of degree, Identity of a perfect gas scale and absolute scale. 	
11	Entropy	12
	 Concept of entropy, Clausius theorem, Entropy as a point function, Change in entropy in reversible and irreversible processes. Change in entropy of an ideal gas, Change in entropy when two liquids at different temperatures are mixed (or two bodies at different temperatures are kept in contact). Principle of increase of Entropy, Change in entropy of the universe in an irreversible process, Disorder and heat death of universe. Physical significance of Entropy, Temperature - entropy (T - S) diagram, third law of thermodynamics. Keywords/Tags: Reversible process, Entropy, Ideal gas. 	
	 Thermodynamic potentials and kinetic theory of gases 1. Thermodynamic potential and its application: 1.1. Thermodynamic potentials, Thermal equilibrium, Internal energy, Helmholtz free energy, Enthalpy and Gibbs free 	12
