7.1.3 E-Waste Management

E-Waste Reduction through System Upgrades:

Timely Upgradation: The Institution follows a proactive approach to minimize e-waste by regularly upgrading computer systems. This ensures that our electronic equipment remains current and functional, reducing the need for premature disposal.

Extended Lifespan: By upgrading systems, we extend the lifespan of electronic devices, reducing the frequency of replacements and conserving valuable resources.

E-Waste Room and Learning Opportunity:

E-Waste Workshop: An e-waste room is established on our premises serving as a dedicated space for managing unusable computer systems. This room facilitates the dismantling, repair, and assembly of electronic items, promoting resource recovery and innovation.

Student Engagement: Through the e-waste room, students gain hands-on experience in hardware components and electronic repair techniques. This practical learning opportunity enhances their understanding of electronic waste management.

Responsible E-Waste Disposal:

Adherence to Government Norms: The disposal of e-waste follows strict guidelines set by the M.P. Pollution Control Board. All electronic items are written off before being handed over to vendors for further processing. Small electronic discards may be given to the dedicated basket of the D2D Garbage collecting vehicle of IMC.

(NAAC 'A' Grade Accredited)

Designated Collection Points: Sagar Municipal Corporation (SMC) designates specific collection points and authorized vendors for e-waste disposal. Our institution ensures that e-waste is directed to these designated points.

Positive Impact:

Environmental Conservation : Our e-waste management practices contribute to the reduction of electronic waste, preventing its accumulation in landfills and minimizing harmful environmental impacts.

Resource Preservation: By extending the lifespan of electronic devices and promoting repair and rescue, we conserve valuable resources that would otherwise be used in manufacturing new products.

Educational Empowerment: The e-waste room provides students with practical skills and knowledge in electronic repair and waste management, fostering a generation of environmentally conscious individuals.

Community Awareness: Our responsible e-waste management practices set an example for the campus community and promote awareness of sustainable electronic consumption and disposal.

Thus, through strategic system upgrades, innovative e-waste management practices, and adherence to government norms, our institution demonstrates a commitment of minimizing e-waste generation. By providing students with educational opportunities and contributing to environmental conservation, we create a positive impact on both our campus and the broader community.
