PAPER V: PRACTICAL

Advanced Cartography and Quantitative Techniques

UNIT I

Introduction- Trends of the development of Cartographic techniques for the analytical and prescriptive aspects in the use of maps. Thematic mapping of socio-economic data: sources and techniques of analysis of socio-economic data.

Types of Diagrammes- Maps, two dimensions and three dimensions, i.e., pyramids, sector diagram, graduated circles, sphere method, block diagrams.

Application of Quantitative Methods- Elementary probability, the normal distribution. Sampling: basic concepts and methods, spatial sampling.

Thematic Mapping (Physical) to trace the prominent features of the area to be surveyed. Identify salient landform features of the selected area on the topographic sheet.

Use following methods for landform analysis: relief and stream profile, relief, slope analysis and drainage density.
